PROFILE

Software and AI Developer with experience building production AI, backend, automation, and data systems across biomedical research, public-health surveillance, and enterprise analytics. Strong background in Python, APIs, microservices, LLM agents, tool orchestration, data integration, and secure multi-tenant platforms. Experienced turning ambiguous workflow problems into practical prototypes and scalable production systems.

EXPERIENCE

Software / AI Developer | Pacific Analytics Pty Ltd

Dec 2024 - Present

- Led the design and delivery of scalable AI-enabled platforms for production-ready operational workflows.
- Developed secure, standards-aligned data platforms for governed analysis across distributed environments.
- Architected 'Lumi', a multi-agent AI assistant featuring tool orchestration, memory, and auditable workflows.
- Designed scalable data discovery and analytics capabilities for high-volume dataset processing and export.
- Delivered distributed workflow and data-processing services with asynchronous execution and API integrations.
- Implemented analytical and anomaly-detection pipelines using statistical modelling and adaptive thresholds.

Data Engineer / Data Analyst | Smrtr Pty Ltd

Jan 2021 - Nov 2024

- Delivered enterprise data engineering and automation solutions, progressing from Analyst to Engineer.
- Built reliable SQL data pipelines and reporting layers for complex analytical datasets.
- Analyzed behavioral datasets and developed stakeholder dashboards supporting ML data workflows.

Undergraduate Research Assistant | The Australian National University

Jul 2019 - May 2020

- Developed ML models to predict mechanical properties of magnesium alloys for vehicle research.

TECHNICAL STACK

- **Languages:** Python, TypeScript, JavaScript, SQL, Rust, Go
- **AI / ML:** LLM Agents, Tool Orchestration (Vercel AI SDK, CrewAI), Multi-agent Systems (LangGraph), Frameworks (LangChain, Google ADK), Prompt Engineering, RAG Retrieval, Semantic Memory, Guardrails, Monitoring
- **Backend / APIs:** FastAPI, Django, REST APIs, Microservices, Pydantic, SQLAlchemy, Elysia, Drizzle ORM
- **Data:** PostgreSQL, ClickHouse, Redis, MongoDB, Parquet, Spark, Hadoop
- **Platform / DevOps:** Docker, Kubernetes, AWS, Celery, RabbitMQ, CI/CD, Automated Testing
- **Security:** Keycloak, JWT, OAuth2, RBAC, OPA, Audit Logging
- **BI / Visualisation:** Microsoft Power BI, Tableau
- **Cloud:** AWS, GCP

EDUCATION

Bachelor of Advanced Computing (Honours), Computer Science | The Australian National University

2018 - 2021

Specialisation: Intelligent Systems

Bachelor of Science, Computer Science | Manipal Academy of Higher Education

2016 - 2018
